

LUTHI 3MGD DICER

Can Do.

LUTHI.COM

Outstanding performance, no matter how you cut it.

How it works:

Luthi cutting machines are designed to produce square or rectangular segments (two-way cuts) for a variety of products, including meat, poultry, tuna fish, pet food, as well as baked goods and candy used in retail settings.

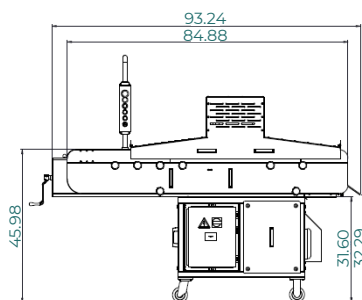

The 3MGD model boasts a straightforward yet durable design, ensuring dependable performance over many years. Its cantilever construction allows for easy removal of the product belt, simplifying cleaning and wash-down processes. Adjustable settings for cut size and speed, along with accessible lubrication points and replaceable components, make maintenance straightforward and convenient.

Applications:

- Produces 1/4" to 2-1/8" (6 mm to 54 mm) square dices

Technical Information:

- Machine length: 95in / 2413mm
- Machine width: 30in / 762mm
- Machine height: 76in / 1930mm
- Belt width: 14.5in / 368mm
- Discharge height: 32in / 812mm
- Maximum stroke: 4in / 22mm
- Motor: 3 H.P.
- Net weight: 1000lb / 455kg
- Crated weight: 1700lb / 772kg

Key Features and Benefits:

OPTIMAL PRODUCT APPEARANCE

Cut is made with a chopping/guillotine action; product is not extruded or force-fed, minimizing slivering and fines.

VOLUME + SIZE CONTROL

Processes up to 5,000 pounds (2270 kg) per hour, dependent on model, cut size and product density. Cut size is variable within the size ranges indicated above.

SANITATION + SAFETY

Construction is stainless steel, and components in contact with the food product are food-grade approved and designed for ease of cleaning and sanitizing. Current U.S. and CE safety standards are rigidly adhered to.
